

Model SFC-24 Pump

Positive Displacement Pump for Liquid CO₂

Reliable, Accurate and Consistent Performance

The Model SFC-24 Positive Displacement Pump provides reliable, accurate and reproducible pumping of liquid CO₂ for SFC, SFE, and other applications. The SFC-24 is available with a maximum flow rate of 24 mL/min, and can reach pressures to 10,000 psi.

The pump's constant pressure mode features a selectable pressure set point. The flow rate auto-adjusts to maintain pressure. The SFC-24 features integrated cooling systems using Peltier thermoelectric modules.

Easy Maintenance

The cooling is fully self-contained within the pump cabinet, eliminating the need for external refrigeration units and the associated piping, coolants, and Freon. Peltier technology is 100% solid state.

Standard Features

- All aluminum pump heads (for heat transfer)
- Integrated cooling system using Peltier thermoelectric modules
- Stainless Steel fluid path (other than pump heads)
- In-line electronic pressure transducer
- Simple front panel keypad controls with led display
- Motor stall detector
- Outlet filter
- RS232 and remote voltage control standard

All Pumps carry a 3-Year Warranty.
